

MEMORANDUM

TO: All Staff – Registration, Finance, and Technical Departments

FROM:

DATE: September 22, 2025

SUBJECT: Summary of Decisions from the Meeting Held on September 22, 2025 – Updates to Registration Processes for Sellers, Importers, Manufacturers, and Repairers

1. Introduction

This memo outlines the key decisions and action items from the meeting held on September 22, 2025, regarding the registration processes for sellers, importers, manufacturers, and repairers. The purpose is to ensure consistent implementation of new procedures and system enhancements across all relevant departments.

2. Seller Registration

2.1 Application Process

New and renewal applications will be accepted through the online system.

Business details, instrument information, and supplier details must be completed.

A dropdown menu with suggested equipment models will be available.

2.2 Fees and Payments

A fixed fee structure will apply per shop, though instrument-specific pricing may be introduced later.

Online payment options must be available using a reference number and amount.

The Finance Division will verify payments before applications are processed.

2.3 Certificate Issuance

Certificates will include the company name, owner's name, and address, with key details highlighted.

Certificates will use initials, while user accounts will use full names.

2.4 Approval Workflow

Registration Officers will evaluate applications and may request additional information.

Approved applications will be forwarded to the Head of Registration for final approval.

3. Importer Registration

Applications (new or renewal) must include applicant details, instrument information, and technical officer assignment.

Pattern approval numbers must be selected from the system.

Fees will be displayed for online or physical payment.

Quotation and price list configurations will be editable via the UI in response to gazette changes.

4. Manufacturer Registration

4.1 Application and Validation

Technical officers must be validated at the time of application submission.

Equipment descriptions and certificate numbers must be provided.

4.2 Site Visits

The Pattern Approval (PA) Committee will schedule site visits instead of inspectors.

Customers will be notified and may accept or request rescheduling.

Field officers will submit visit feedback; failed visits will require rescheduling.

4.3 Certificates

Workshop address and company name (as per Business Registration) will be included in the certificate.

5. Repairer Registration

5.1 New Applications

An exam will be required, with dates set by the Registration Officer.

Pass/fail results will be evaluated by the Technical Officer, then forwarded to the Head of Registration and Director for approval.

5.2 Renewals

No exam is required for renewal applications.

Workshops will be reviewed every five years.

Site visits may be waived if the previous certificate was issued within the last five years.

6. General Business Rules

6.1 User Management

Employee accounts will be deactivated upon resignation—not deleted.

Admin users will have the ability to transfer business admin permissions.

6.2 Business Registration

Authorized users must provide NIC and address details.

Group companies may be registered under a single certificate.

7. System Enhancements

A dashboard will be implemented for reports and pending application tracking.

A UI will be developed to edit registration conditions in response to gazette changes.

Document upload functionality will be supported for all application types.

8. Committee and Approvals

The PA Committee (3 members) will be notified for manufacturer-related applications.

Director approval is required for repairer exams and select workshop approvals.
